HISTORY, COLLECTING AND MODELING

Since 1997 Andrea Press has been a publisher of quality books in a number of languages that have been the subject of praise the world over. The first books dealt with aspects of modeling and were a logical continuation of the fact that Andrea Press was an early daughter company of Andrea Miniatures, well known as a foremost manufacturer of historical miniatures and models.

Eventually Andrea's publishing arm evolved into related fields of interest: primarily military history and collecting. This was a logical evolution, as both subjects go hand-in-hand with the process of creating miniatures. Whatever the reason, Andrea Press has grown over fast the last seventeen years and is now a prestigious publishing company in its own right. At Andrea Press, books are regarded as the best vehicle for accurate and independent knowledge. In the era of visual, mass communication, where a picture is supposed to be worth more than a thousand words, we strive to develop a meaningful balance between the two. Any new book is a fascinating project and one into which a lot of care and love is poured in the sincere hope our readers may enjoy a solid, appealing product.

In 2011 Andrea Press expanded into the North American Market by establishing an office and a warehouse in Texas.

A fully illustrated layout, style and accuracy are our commitment and trademark.

This catalogue presents all the books on our published list divided in three themes that define the Andrea Press identity, History, Militaria, Modeling and Collecting, and includes a brief summary of their main contents and features.
